Projects: zagoapps.com/#projects

SKILLS

INFRASTRUCTURE & DEVOPS
Terraform, AWS, Kubernetes, Docker, ArgoCD, Helm, GitHub Actions, GitOps, CI/CD

PROGRAMMING
Go, Python, Node.js, React

TOOLS & PLATFORMS
Git, Linux

EDUCATION
BEng in Computer Science
[Koszalin University of Technology](#)
Oct 2023 – Feb 2027

IT Technician Diploma
[Technical Secondary School No. 2, Kołobrzeg](#)
Sep 2020 – May 2024

LANGUAGES
Polish
Native
English
Professional working proficiency

SUMMARY

Running my own Kubernetes cluster with GitOps-driven deployments, and building personal cloud projects on AWS with Terraform. Maintaining client websites as my day job.

PROJECTS

k3s GitOps Cluster[github](#)

k3s · ArgoCD · Helm · GitHub Actions

- Custom [CLI](#) for Helm chart generation and deployment automation.
- Full GitOps: ArgoCD reconciles the cluster against this repo using the app-of-apps pattern, with self-heal and auto-prune enabled.
- Automated image updates — GitHub Actions in each app repo builds the image and bumps the tag in manifests here, using shared reusable workflows.
- Monitoring stack with Prometheus and Grafana.
- Traefik as GatewayAPI/Ingress controller with Cert Manager handling automatic TLS via dns-01.

Nyanwatch – Endpoints status notifier (AWS)[github](#)

Terraform · Lambda · ECR · Scheduler · SSM Parameter Store

- CI/CD pipeline using GitHub Actions to automate Docker image builds, push to ECR, and deploy to AWS Lambda.
- Fetches monitored endpoints from SSM Parameter Store and checks their availability.
- Detects service status changes based on DynamoDB data and sends appropriate notifications.

Full project list available at zagoapps.com/#projects

EXPERIENCE

Web SpecialistApr 2024 – Present

[Internet Plus](#) | [Remote](#)

- Configuring automated WordPress deployments for team testing.
- Deploying and maintaining client websites across multiple production environments.
- Diagnosing and resolving issues on production websites, including subpage rebuilds and third-party service integrations.

IT InternFeb 2020 – Mar 2020

[DiskON](#) | [Kołobrzeg, Poland](#)

- End-user hardware configuration and operating system reinstallation.
- Diagnosing and repairing hardware faults in laptops and desktop PCs.
